
Vacancy for a CMC coordinator

Protinhi Therapeutics is looking for a talented CMC coordinator to join our dynamic team focused on the discovery and development of new medicines against viral diseases. The COVID-19 pandemic clearly demonstrated the importance of antiviral discovery to combat viruses which pose epidemic and/or pandemic threats to global society. Protinhi aims at identifying new drugs outside of the conventional chemical space to disrupt replication and further transmission of infectious diseases such as dengue, Zika, West Nile virus, Chikungunya and corona viruses.

Tasks and responsibilities

You will be involved in the (early) development of (pre)clinical candidates. This involves DS, DP and analytical development from early synthesis to GMP productions. The following tasks will be part of your responsibilities:

- Manage and coordinate various outsourced activities at CRO's/CDMO's.
- Ensure product and process development activities meet the stage-specific regulatory requirements.
- Develop and maintain CMC plans, materials for strategy development and prioritisation (e.g. Gantt charts), risk management strategies.
- Final quality and timely delivery of outsourced manufacturing and quality control deliverables.
- Contribute to IMPD/IND writing.
- Responsible for one or more internal projects.
- Contribute to discovery projects

Required qualifications and experience

Required qualifications:

- MSc or PhD in Organic Chemistry, chemical engineering or related field.
- 2+ years experience in scale-up and manufacturing of API's
- Experience in DS and DP development.
- Comfortable with explaining technical concepts to a multidisciplinary team.
- Excellent communication skills in English.
- Can work individually or as part of a team.
- Creative, flexible and entrepreneurial personality.

Valued additional qualifications

- Acquainted with pharmacology concepts.
- Medicinal chemistry expertise will be an advantage

Who we are:

You will be working at Protinhi Therapeutics, a young biotech company which is located at the Novio Tech Campus in Nijmegen, The Netherlands. Protinhi started as a spin-off of the Erasmus University Medical Centre (Rotterdam) and the Radboud University Nijmegen.

What we offer:

Fulltime position (32 hours can be discussed). The position provides a challenging opportunity to become active in the battle against infectious diseases as part of an enthusiastic multidisciplinary team. This position provides an excellent basis for widening your R&D skills and broadening the scientific horizon in a dynamic environment. We offer a contract for one year, with an option for extension, at a competitive salary.

How to apply?

Please send your application letter and curriculum vitae in English to info@protinhi.com
